CHERRY PECTORAL
For the Cure of
COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

This invaluable remedy for all diseases of the throat and lungs, has attained a celebrity from its remarkable cures, never equalled by any other medicine. Other preparations have proved themselves palliatives, and sometimes effected notable cures, but none has ever so fully won the confidence of every community where it is known. After years of trial in every climate, the results have shown indisputably that it possesses a mastery over this dangerous class of diseases, which could not fail to attract the notice of Physicians, Patients, and the public at large.

See the statements, not of obscure individuals, and from distant places, but of men who are known and respected throughout the country.

The widely celebrated Surgeon, Doct. VALENTINE MOTT, of New York City, says:
"It gives me pleasure to certify the value and efficacy of Ayer's Cherry Pectoral, which I consider peculiarly adapted to cure diseases of the throat and lungs."

Dr. PERKINS, the venerable President of the Vermont Medical College, one of the eminently learned physicians of the country, writes, "the Cherry Pectoral is extensively used in this section, where it has shown unmistakable evidence of its happy effects upon pulmonary diseases."

The Rev. Dr. E. COCHRANE, a distinguished Clergyman of the English Church, writes to the Proprietor that [illegible] had been cured of a very severe affection, by Cherry Pectoral. His letter [illegible] found in our circular, [illegible] and is worth the attention of consumptives.

From a letter from the well known Druggists [illegible], one of the largest dealers in the [illegible] this is from his own observation:

ELEGANT AND INVALUABLE
Articles for the Toilet
Bogle's Hyperion Fluid.
For Restoring, Preserving, and Embellishing the HAIR.

The following Certificate, from Dr. Winslow Lewis, one of the most eminent Physicians of Boston, will show the estimation in which it is held by the scientific and learned, being one only of many similar ones.

Boston, Feb 15, 1847.

Mr. Wm. Bogle,—Sir: The preparation invented by you for the hair, has been extensively used in my family, and they give it the decided preference over all other compositions of the kind. It invigorates and beautifies the hair, and cleans the skin of all impurities, without producing any ultimate deleterious effects, which are so frequently the result of many well known patented compounds, &c.
WINSLOW LEWIS.

It is an indispensable article for the Ladies, as it keeps the hair supple and curl, and the skin of the head free from dandruff and scurf. For children, it lays the foundation of a good head of hair.

BOGLE'S AMOLE,
A COMPOUND FOR SHAVING.

This delightful article is totally different and far superior to anything yet invented for shaving. The base of it is formed from the *Amole*, a natural plant of California, an article used by the natives of that country for washing; and this, [illegible] with its healing and detergent properties have the happiest and most nourishing effects on the skin—it soothes and allays irritation, and has a fine, thick, creamy lather, which does not dry on the face. It is a decided luxury to shave with this incomparable soap. It is done up in elegant style, calculated either for the toilet of the ready traveller, or the toilet of the most fastidious connoisseur.

Bogle's Hebeaiona,
FOR REFRESHING AND BEAUTIFYING THE COMPLEXION,

Eradicating Tan, Pimples and other eruptions of the skin, and rendering it fair, delicate and blooming. It is of infallible efficacy in protecting the skin from the hot sun of summer, and freezing blasts of winter, and is the most fragrant and delicious article to be found in the toilet of fashion.

All the above articles have stood the test of the strictest investigation, and are warranted superior to anything yet invented; but, if not found to prove so on trial, the money, in all cases, will be refunded by my Agents. WILLIAM BOGLE, Proprietor, 277 Washington St., Boston, Mass.

PATENTS,

AGENCY FOR BUSINESS
WITH U. S. PATENT OFFICE,
WASHINGTON.
No. 22 State Street, Boston.

IN 1840 the subscriber was appointed by the Commissioner of Patents, Agent of the U. S. Patent Office, in accordance with the 10th Sec. of Act of 1837.

Having relinquished the Agency for the transmission of Models, and adopted a more expeditious mode of sending them to the Patent Office, *whereby a Patent may be procured about six weeks earlier*, he continues to forward them free of expense—to prepare Caveats, Specifications, Assignments, and all the necessary Papers and Drawings for Patents; and to render advice on legal and scientific matters respecting the same. Patents secured in Europe and other countries.

By application at this office, inventors are saved the time and expense of a journey to Washington and delay there, as well as all personal trouble in obtaining their patents. They also have the advantage of verbally explaining their inventions, and of consulting in respect to them; *matters, in general, of paramount importance in order to obtain correct specifications and claims.* The experience, of sixteen years practice, an extensive collection of rare works, decisions, &c. of mechanical subjects, the Patent Laws, and patents of different countries, collected at much expense during the long time this office has been established, together with accounts here kept of inventions patented at Washington, enable the subscriber to afford to inventors desirous of procuring Patents, assistance and information which in other respects might be difficult of attainment.
R. H. EDDY, Solicitor of Patents.

WASHINGTON, JULY 21, 1849.—During the time I occupied the Office of Commissioner of Patents, R. H. EDDY, Esq., of Boston, did business at the Patent Office as Solicitor for procuring Patents. There were few, if any, persons acting in that capacity, who had so much business before the Patent Office, and there were none who conducted it with more skill, fidelity and success. I regard Mr Eddy as one of the best informed and most skillful Patent Solicitors in the United States, and have no hesitation in assuring Inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office. EDMUND BURKE,
Late Commissioner of Patents.

"The hills
Rock-ribbed and ancient as the sun,—the vales
Stretching in pensive quietness between;
The venerable woods—rivers that move
In majesty, and the complaining brooks
That make the meadows green, and poured round all,
Old ocean's gray and melancholy waste,—
Are but the solemn decorations all
Of the great tomb of man."

"Thou who would'st see the lovely and the wild
Mingled in harmony on Nature's face,
Ascend the rocky mountains.
"Thou shalt look
Upon the green and rolling forest tops,
And down into the secrets of the glens,
And streams, that with their bordering thickets strive
To hide their windings. Thou shalt gaze, at once,
Here on white villages and tilth and herds
And swarming roads, and there on solitudes
That only hear the torrent and the wind
And eagle's shriek."

"I gazed upon the glorious sky
And the green mountains round;
And thought when I came to lie
Within the silent ground,
'Twere pleasant, that in flowery June
When brooks sent up a cheerful tune,
And groves a joyous sound,
The sexton's hand my grave to make,
The rich, green, mountain turf should break."

"—this bleak wild hill—but green and bright
In the summer warmth, and the midday light;
There's the hum of the bee and the chirp of the wren,
And the dash of the brook, from the alder glen;
There's the sound of a bell from the scattered flock,
And the shade of the beech lies cool on the rock,
And fresh from the West is the free wind's breath,—
There is nothing here that speaks of death."

Enameled Leather.

The town of Haverhill, has during the past year made itself somewhat famous for its superior manufacture of enameled leather. Until lately, nearly all the enameled leather which has been used in the United States has been manufactured at Newark, N. J. Hundreds of persons in the Eastern States have tried to succeed in manufacturing the article, but defeat and loss were sure to follow. The leather would either be black on both sides, gummy and sticky, in a warm day, or hard and brittle when it was cold. With these examples of smart and industrious mechanics before him, Henry Butters, of Haverhill, who has been in the business from boyhood, determined to make the attempt, and if he failed *once* to try it again, and so on until he had failed seventy times seven, and then—succeed or "perish in the attempt." When a shrewd, ingenious Yankee takes out his jack-knife, and with a contraction of the muscle exclaims—"Do, or die!" the job is always half finished to begin with. *Perseverance* will work wonders which our 'pod-auger' men never dreamed of.

Leaving his business in the hands of his friend, Mr. Butters departed post-haste for Newark, to 'get a job;' but the company at that place thought there was too much of the Yankee about the whites of his eyes to be employed with safety about the premises, and he was therefore given to understand that 'spectators was'nt allowed,' and they didn't want no help.' But he was well paid for his journey, for he saw the form and style of buildings, and he then returned home, and immediately commenced erecting his buildings for the "extensive manufacture of first quality enameled leather."

The public looked on with doubt, and exclaimed, 'Humbug,' while a few trusty friends gathered about and exclaimed—'If any man alive can succeed in the experiment, Henry is the man, and if he needs assistance or encouragement, we'll be the last to doubt him.'

While the building was being erected, under Butters' special superintendence, he was also experimenting in manufacturing the black and brilliant composition that constitutes the coating which the leather is to receive, and by the time the building was finished, he had succeeded with the composition beyond his fondest hopes.

He now finishes about three hundred sides of leather per week, which commands the highest price paid for that manufacture in any part of the world. The gloss is as brilliant as that on German crown-glass, and what is remarkably peculiar to his leather, it is as soft and pliable on the back as silk velvet. The leather may be doubled up, crushed, or stepped on, but no effect can be seen on the enamel—the brilliancy is still there, and neither heat nor cold can affect the smoothness or durability.—Boston Museum.

Money and Business.

It appears by statistics in the Dry Goods Reporter of a late date, that out of $17,151,509 worth of woolen fabrics imported into this country in 1850, $14,877,122 were entered at New York, and that of the whole value of cottons, say $22,103,719; about one half, or $10,325,185, came through the same channel. The increase in the importations of woolens into New York in 1850, over those of 1848, amounted to $5,398,522, or about 60 per cent; the entries at other ports have decreased in the same ratio. Three-fourths of the imports of the whole Union are made at New York.

The above are facts worthy of the attention of every one who is interested in the value of American labor or the advancement of American interests. Every man, be his business what it may, is interested in what effects, for good or for evil, the whole community. Each branch of trade—every department of industry is affected by the condition of the other. If the manufacturing establishments are in active and prosperous operation, labor has to be performed, for which living prices are given, furnishing operatives with the means to provide for themselves and families, and to patronize and make profitable other Departments of American industry in the vicinity where these manufacturing establishments are situated.—Which is in the most prosperous condition, the farmer, who pays ten cents a yard for cloth, and can find a ready market, at living prices at his own door, and gets cash for his pay, or the farmer who buys cloth for eight cents per yard and has to truck his produce from ten to twenty miles to market and gets no cash for his pay? Whenever labor is in good demand and well paid for, business of all kinds will be brisk, and whatever is called for by man's necessity or conduces to his comfort, will be in good demand also. The reason is obviously that labor is the real wealth and true measure of value in every community. If labor is in good demand and commands good prices, the community is prosperous. If not, then the community is not prosperous.

Which community is the most prosperous, one which pays 3, 4, or 5 per cent more for his articles of consumption and keeps all his money at home, and circulates it among its own members, or the one which buys its commodities somewhat cheaper, and sends all its money abroad? Which is getting rich the fastest, the one who earns $10 per week and pays $5 for his board, or the one who earns nothing and pays $2 per week for his board? Which community is most benefited by the building of a ship in its midst, the one where she is built six hundred dollars cheaper and the iron used in its structure all imported, and the one which costs six hundred dollars more, and the ore and labor whence its iron is manufactured all [illegible]

...al at home? The ruinous free trade system of '46 has already done very much towards cramping the enterprise and paralyzing the energy of our citizens, and the centralizing and accumulating tendency of the present tariff system will eventually do much more towards checking our growth and making our citizens poor. New York has attained a large portion of this foreign trade by gross fraud upon the revenue, and the legitimate tendency of the Tariff of '46 is to encourage fraud or check home interests. We wish the people to carefully consider to whom this outrage upon their interest is due. [Bath Tribune.

☞ The editor of the Jeffersonian, in substance, repeats his slanders this week against this press. If he were not a contemptible driveller and calumniator he would make some effort, however feeble, to establish at least one point against us. But he is a slanderer and a vile one, and acts as though he felt perfectly safe to run from one lie to another to prevent being caught. He thus proves his want of manhood, his want of good principles and his want of good sense. In this community we are sure that his slanders cannot harm us; and that, if he should undertake to establish the least of his statements reflecting against us, he would utterly fail; and that his efforts only tend to prove him to be, what we fully believe him, a vile calumniator.

☞ The Hungarian Colony at New Buda, is an excellent one to be imitated by emigrants coming to America. Instead of wasting time in appealing for sympathy in our crowded cities, this band of Hungarians promptly proved their worthiness of respect, by the manner in which they established themselves as pioneers, in advance of the northwestern settlements. It is announced that the United States Land Office has reserved from public sale the lands occupied by the Hungarian Colonists, until Congress shall have time to consider the propriety of donating to these enterprising exiles, the farms on which they have located.

Fat Cattle.

A fine pair of very fat oxen were exhibited in our city yesterday. They were raised by Mr Levi Campbell of Sangerville, are seven years old and weigh 4000 lbs. These cattle are fine specimens of Maine fat cattle and are handsomely cushioned with golden fat. Messrs Baker & Laughton purchased the cattle and drove them to this market and disposed of them to our Marketman, M. D. Rice, for the supply of his stall and to gratify his customers.

Those who would like to look upon a pair of really handsome oxen can have an opportunity to do so to-day as they will be exhibited in front of the Kenduskeag Market.

His mother, wife, daughter, and hired man were soon seized with violent illness. The two latter under the skillful management of Dr. Bartlett, have nearly recovered, while the wife and mother are in a precarious condition still.

MORE GAS. Mr. Paine, who claims to have invented a method of producing light and heat by the combustion of water, not satisfied with his discovery, has hit upon a still cheaper and more abundant fuel. The Worcester Spy says:—

"Although the Patent of the Hydro Electric Light has been secured, Mr. Paine has not remitted his investigations, and at last has discovered a process of catalyzing the oxygen of the atmosphere, and rendering it highly luminiferous at a mere nominal expense, without the cost of machinery, or any other apparatus than an air receiver, capable of holding common air. We saw it in operation last evening in our office, examined it minutely, catalized the oxygen ourselves, and read by the light so produced, which is equal, if not superior, to the best gas burned in the cities. The flame is peculiarly bright and brilliant, burns with a clear steady light, is entirely inodorous, and during the half hour that we watched its operation, we could see no consumption of the catalyzing material. The whole apparatus which we saw, could not have cost more than a couple of dollars, and it was capable of furnishing all the light needed for the illumination of an ordinary sized room."

Among the passengers who sailed from this port yesterday, for Liverpool, in the steamer America, was our old friend, George Dawson, Esq. junior editor of the Albany Evening Journal.—Boston Atlas.

Agriculture this year will be an important feature in California—a large portion of the population having turned their attention that way. If Congress passes any law by which the Farmer may know he has a good title to land he improves, the State will supply her consumption in a few years. Politics are exciting attention, and the people are marshalling for a contest. The Legislature is still in session but no further attempts have been made to elect a United States Senator. Probably nothing will be done this session.

NEW YORK, May 6.

The steamship Georgia via Havana has arrived at New York with the California mails and bringing $1,600,000 in gold and 500 passengers from Chagres to Havana, and it is reported that she left 600 at Havana. [Probably a mistake.]

The Georgia left Havana on the 1st instant.

There was great excitement in Havana in relation to the expected invasion, and every approaching steamer and vessel were locked upon with suspicion.

Many persons had been arrested on suspicion of being concerned in the anticipated invasion and attempt to overturn the government, and these persons have been thrust into prison—among them are three priests.

One man has been executed after having been subjected to severe tortures for the purpose of getting from him a confession.

A row occurred between some American seamen and the inhabitants of Havana when the seamen were arrested and their heads put into the stocks where they were so ill treated that two of them subsequently died.

The fourth of the Chagres murderers has been arrested at Porto Cabello and brought to Panama where he was confined in prison. The Georgia reports that they were all to be shot in a few days.

The Tennessee which arrived at Panama on the 10th, had on board seven hundred thousand dollars in Gold Dust and two hundred passengers.

The Columbus brought $920,000 on freight. Two boxes of gold dust was stolen on the Isthmus, for which, a reward of $3000 is offered.

The rainy season had not yet set in at Chagres.

The railroad will, it is said, be finished to Gorgona by the last of July if the weather continued good.

Chagres was healthy. Inhabitants have established a regular police, and life and property are much more safe than heretofore.

Health at San Francisco is remarkably good. So with the rest of the State.

The Legislature passed a bill authorizing the Attorney General to enter a *nolle pros* in case of Chas. Robinson and others at Sacramento, indicted for conspiracy and murder in the Squatter war, which has been vetoed by the Governor.

"Courier" says the labors of miners are well rewarded, and new and rich discoveries of mineral wealth are constantly being made.

Gold bluff excitement has entirely ceased and one half of the vessels engaged on the route to that point have been withdrawn.

Political news not important.

The Indian troubles are nearly at an end, treaties having been concluded with several of the most hostile tribes.

The first fugitive slave case was brought before Judge Morrison on the 30. The Judge was to give his decision next morning. Slave is named Frank, and was brought here by an Irishman. He left his master and claims his freedom.

Judge Thurston of Oregon died on board the California and was buried at Acapulco.

Senator Gwin had been ill but was recovering at last accounts.

SAN FRANCISCO, March 31st., 1851.

Lumber continues inactive and the additions to the stock on hand fully equals the sales.—There is little probability of any advance for some months. A heavy business for the latter part of next month is confidently anticipated.

Financial affairs of the city are in a most favorable condition.

Gold dust of a good quality commands $17. All banking houses have entered into an agreement to take it at that rate.

Wilfred and Stuart indicted for murderous assault and robbery of Mr. Janson, and whose supposed guilt had been well nigh expiated by Lynch Law and a rope, have been tried before the District Court and found guilty of assault with intent to kill and robbery. The Jury sentenced Stuart to 14 years in penitentiary—the utmost they could give him. He has since been taken to Yuba County to be tried for murder.

Wilfred was sentenced to 10 years in penitentiary.

BALTIMORE, May 5.

New Orleans mails of 29th ult. has arrived, Gov. Quitman, Gen'ls O'Harra, Lopez and Gonzales are announced in Savannah papers as leaders of the Cuba expedition, and they were mustering forces in that State.

CHARLESTON, May 5.

The Convention met here to day. Large numbers of delegates are present and much feeling existed but there is much uncertainty as to the course that will be adopted. City is crowded with strangers.

GEO. FARRINGTON'S stock of notions are so electrical in their development, as well as his most splendid and magnificent establishment, that customers as they pass in that direction, gaze with wonder and astonishment at the miraculous attractions of this very wonderful Saloon.

☞ More than one hundred persons of the first respectability, and among them one of the best medical practitioners in this country, have certified to facts from their own experience and knowledge, which prove beyond a doubt, that for cases of General Debility and Indigestion, giving rise to Sick Headache, Pains in various parts of the body, and other Nervous Disturbances which being often misunderstood lead to the approach of consumption and other dreadful diseases—there is no remedy so generally indicated as HOLDEN'S ALTERATIVE AND TONIC MIXTURE.

Bliss's Compound Cod Liver Oil Candy.

Spurious medicines spring up like weeds in a garden, and like them they prove injurious to whatever they come in contact with. No medicine probably ever had a greater number of counterfeits than Bliss's Candy; but this fact speaks volumes of its excellence as a remedy for coughs, colds, and consumption. If it were not a good article, and did not the public admit it, it would not be counterfeited—this is clear! But the purchaser must avoid the spurious article, and purchase only Bliss's Candy, which is the original and only genuine article.

Prepared only by B. K. BLISS, Druggist, Springfield, Mass. Price 25 cents a package. For sale in Bangor by LADD & INGRAHAM. d&w apr 10

GENUINE BALM OF COLUMBIA.

IF you wish a rich luxuriant head of hair, free from dandruff and [illegible] do not fail to procure the genuine Balm of Columbia. In cases of baldness, it will more than exceed your expectations. Many who have lost their hair for twenty years have had it restored to its original perfection by the use of this balm. In all cases of fever it will be found the most pleasant wash that can be used. A few applications only are necessary to keep the hair from falling out. It holds three times as much as other miscalled hair restoratives and is more effectual.

FROM THE STATE OF MAINE.

The attention of the reader is called to the following certificate of a remarkable cure effected by using only five bottles of Sands's Sarsaparilla:

SIDNEY, (Maine,) April 15, 1850.

Messrs. A. B. & D. Sands—Gentlemen—This is to certify that the subscriber, of Sidney, County of Kennebec, State of Maine, has been [illegible] more or less [illegible] with Scrofula [illegible] continued to increase until last February. In January my legs were so swollen I could not get on a boot or stocking, and had several large sores on them [illegible] I was almost giving up in despair, when I was recommended to try Sands's Sarsaparilla [illegible] I had not much faith, but [illegible] and procured a bottle [illegible] I had taken five bottles I was perfectly well. THE PILES!

A CURE FOR THE SECURED

DR. UPHAM'S INTERNAL REMEDY FOR THE CURE OF PILES.

The VEGETABLE PILE ELECTUARY, invented by Dr. A. Upham, a distinguished physician of New York city, is the only really successful remedy for that dangerous and distressing complaint the Piles, ever offered to the American public.

This is a new and simple *Internal Medicine*, not an Aloes, Colocynth, Gamboge, or other powerful and irritating purgative. No fear of taking cold while under its influence no change in diet necessary. If taken according to directions a *cure for life is guaranteed.*

Annexed certificate added to the hundreds that have already been received of the efficacy of Dr. Upham's Electuary.

New York, August 25, 1846.

Messrs. Wyatt & Ketcham—Gents: For several years past I have been troubled with piles, a very costive state of the bowels, bleeding and weakness of the system. But my complaint not being so severe as to disable me from business, and as I had a horror of physicians and patent medicines, it was not until this Spring I never used any medicine, or applied to a physician for relief. The Piles being then so severe that I allowed several operations to be performed without any benefit. Determined after this to try other means, I read an advertisement of a cure guaranteed by the use of Dr. Upham's Electuary. I purchased three boxes at your store, and from the use of which I found myself entirely cured of the Piles, and my health much improved. I remain sir, your much indebted friend.

The writer of the above from motives of delicacy, declines having his name used, but authorizes us to refer to him or show the original certificate to those who may doubt its authenticity.

Another fact in relation to the efficacy of Dr. Upham's Electuary.

PHILADELPHIA, Sept. 2, 1846.

Dr. Upham—Dear Sir: About five years ago I was afflicted with what was called Chronic Dysentery. I have suffered with it ever since, and physicians have told me that my liver was affected, and that my bowels were ulcerated for blood and pus attended with a peculiarly putrid smell were the frequent discharges. A short time since I made a visit to Massachusetts, in hopes of benefit from a change of air, but suffered more severely than ever before. While there a physician offered to cure me for $40, in three months. Happily, in the midst of intense pain occasional relieved by laudanum, I saw in a wrapper of your Electuary a perfect description of my complaint, together with many certificates of cures. This gave me great confidence in the medicine and I purchased a box, and nine doses of which has apparently cured me, and am prepared to say every thing in its favor, or render any service I can to humanity by subscribing to its merits.

Respectfully yours, BENJAMIN PERCIVAL,
